THE INTERNATIONAL SUGAR ORGANIZATION

At the time of going to print the following countries were
Members of the Organization:

Argentina, Australia, Barbados, Belarus, Belize, Brazil, Cameroon, Chad, Colombia, Congo Rep. of, Costa Rica, Côte d'Ivoire, Cuba, Dominican Republic, Ecuador, Egypt, El Salvador, Eswatini, Ethiopia, EU-27 (Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden), Fiji, Ghana, Guatemala, Guyana, Honduras, India, Iran Islamic Rep. of, Jamaica, Kenya, Korea Rep. of, Madagascar, Malawi, Mauritius, Mexico, Moldova Rep. of, Morocco, Mozambique, Nicaragua, Nigeria, Pakistan, Panama, Paraguay, Philippines, Russian Federation, Saudi Arabia, Serbia, South Africa, Sri Lanka, Sudan, Switzerland, Tanzania, Thailand, Tunisia, Türkiye, Uganda, Ukraine, United Arab Emirates, United Kingdom, Viet Nam, Zambia and Zimbabwe.

Based on data for 2022, the 87 member-countries of the ISO represent 87% of world sugar production, 64% of consumption, 34% of imports and 92% of exports.

The World Sugar Economy in 2022

The world sugar economy returned a surplus in 2022, after just one year of deficit. World output exceeds global use by 2.612 mln tonnes.

World production during 2022 reached 178.930 mln tonnes, a new record. A year-on-year increase of 13.818 mln tonnes is the second highest in history after 15.049 mln tonnes in 2011. Output increased considerably in Thailand (+5.762 mln tonnes compared to 2021), India (+4.650 mln tonnes), Pakistan (+2.226 mln tonnes), and Brazil (+1.202 mln tonnes). World consumption rose in 2022 to 176.318 mln tonnes, up 7.045 mln tonnes or 4.2% from the previous year. Despite such a considerable growth in the use of sugar, in terms of per capita consumption the world average, at 22.1 kg, just recovered to that of the pre-Covid 2019. The annual growth in sugar use by 1.923 mln tonnes or 14.0% to 15.706 mln tonnes in the EU is particularly impressive. However, it remains considerably lower than 18.108 mln tonnes in 2019.

The volume of sugar traded internationally also increased to a new record at 69.822 mln tonnes, up 6.023 mln tonnes from 2021. Multi-million growth in exports by India (+4.028 mln tonnes) and Thailand (+3.221 mln tonnes) is at the base of this change. No significant change was monitored in the case of Brazil, by far the world's leading sugar exporter. Deliveries of white sugar expanded by 2.514 mln tonnes, while those of raw sugar grew by 3.509 mln tonnes granting a further increase in the share of raw sugar in global trade in 2022. World market imports were headed by China (6.143 mln tonnes, down 1.8%) and Indonesia (6.024 mln tonnes, up 10.4%).

By the end of 2022, world stocks of sugar stood at 120.015 mln tonnes, up 2.611 mln tonnes from the end of 2021. This is equivalent to 68.1% of global consumption.

Despite a statistical surplus, world market prices for both raw and white sugar remained relatively strong throughout the year. Indeed, the lowest daily raw sugar price (measured by the ISA daily price) was as high as USD16.81 cents/lb which can be compared to USD14.72 cents/lb during 2021. Meanwhile, the lowest White Sugar Price Index was USD476.60/t as against USD418.50/t in the previous year. In terms of the annual averages the ISA daily price improved from USD17.67 in 2021 to USD18.50 cents/lb. The ISO White Sugar Price Index grew to USD528.04/tonne from USD471.10/tonne in 2021. As a result, the nominal white sugar premium increased to USD120.15/tonne, up from USD81.57/tonne in 2021.

EXPLANATORY NOTES

The statistics shown in the Sugar Year Book relate to centrifugal sugar only.

Sources:

Most member countries of the International Sugar Agreement submit their statistics under the Rules of the International Sugar Agreement. Data for other countries are either supplied by the governments, extracted from statistical publications or estimated by the ISO.

Time Basis:

Tables are on a calendar year basis.

Quantity Basis:

All figures are expressed in metric tonnes apart from Per Capita Consumption, where data is shown in kilograms.

Quality Basis:

All figures are expressed in tel quel basis.

Production:

Means the total quantity of sugar, whether raw, refined or white, produced from domestic or imported unprocessed beet and/or cane and including sugar produced for purposes other than human consumption as food (which when identifiable, shall be shown separately), but shall exclude quantities processed from imported sugar.

Consumption:

Means the total statistical disappearance of sugar within the country concerned, including:

- (1) Sugar used for the manufacture of sugar-containing products whether exported or not, and
- (2) Sugar used for purposes other than human consumption as food (which, when identifiable, shall be shown separately).
- (3) Consumption figures may not reflect the actual human intake.

Exports:

Means all quantity of sugar, which for the purposes of the Customs or other competent authorities, have left the country, or territory concerned, excluding sugar or sugar containing products for direct consumption as stored on ships, aeroplanes and other carriers, victualling in that country or territory. "Exports" includes re-exports.

Imports:

Means all quantities of sugar, which for the purposes of the Customs or other competent authorities, have entered the country of territory concerned. "Imports" includes imports for re-exports.

Free Market:

Means the total of net imports of the world market, except those resulting from the operation of the special arrangements as defined in chapter IX of the 1977 International Sugar Agreement (which relates to exports to the EU/UK of ACP and Indian sugar covered by the Lomé Convention, the 1975 Agreement between the EU/UK and India, and their successors; and exports by Cuba to Russia, Ukraine to Russia and Russia to the CIS).

Adjustment for Unknown Net-Trade:

An adjustment to the global totals for consumption and imports is made to account for differences between reported exports to unknown destinations and imports from unknown origins, as well as under-reported imports and estimated trade.

Geographical Definitions:

French Territories include St Pierre & Miquelon, New Caledonia and French Polynesia.

Persian Gulf includes Bahrain, Oman and Qatar.

Other Caribbean includes Antigua & Barbuda, Dominica, Grenada, Montserrat, Saint Lucia and Saint Vincent & the Grenadines.

Other Africa includes Equatorial Guinea, Lesotho, St Helena, São Tomé and Príncipe and the Seychelles.

Other Oceania includes all Pacific Islands.

EU: Until 31st December 2020 data apply to EU-28, comprising of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden and United Kingdom.

From 2021, data for EU-27 and UK are presented separately.

Symbols:

e	Estimated
**	Partly estimated

n.i. = Net Importer

* Free Market net export means the total arrived at by adding together each country's net exports after deducting its net imports, if any, under special arrangements as defined in chapter IX of the 1977 ISA (which relates to exports to the EU/UK of ACP and Indian sugar covered by the Lomé Convention, the 1975 agreement between EU/UK and India, and their successors, and exports by Cuba to China and Russia, Ukraine to Russia and Russia to F.S.U.).

n.e. = Net Exporter

* Free Market net import means the total arrived at by adding together each country's net imports after deducting its net exports, if any, under special arrangements as defined in chapter IX of the 1977 ISA (which relates to exports to the EU/UK of ACP and Indian sugar covered by the Lomé Convention, the 1975 agreement between EU/UK and India, and their successors, and exports by Cuba to China and Russia, Ukraine to Russia and Russia to F.S.U.).
