Sugar: the next ingredient set to come under fire for its climate impact?

Meat and dairy are regularly targeted for their environmental impact. In the UK, for example, the government's Committee on Climate Change has recommended a 20% cut in meat and dairy by 2030, rising to 35% by 2050 for meat only. Sugar may be next, warns a report from AI data firm Spoonshot.

Nestlé warns of prices increases, against 'excessive' growth expectations after best quarter in decade

Despite strong organic sales growth and market share gains in the first quarter, Nestlé's CEO warned market analysts yesterday against "excessive margin growth expectations," and cautioned the company could raise prices later this year or early next to offset pandemic-related inflation.

Same taste, half the sugar: DouxMatok launches choc spreads to showcase next gen Incredó 'enhanced' sugar

DouxMatok, the Israeli firm behind patented technology that makes regular sugar taste sweeter, has launched limited-edition chocolate spreads in the US with half the sugar of leading brands to give consumers the chance to taste products made with its 'Incredó' enhanced sugar for the first time.

Coca-Cola Co. weighs price increases as part of 'holistic' inflation management to offset rising commodity costs

While the Coca-Cola Co. is protected against rising commodity costs for now, it could raise prices next year or late this year as part of a multi-prong approach to manage inflation of key ingredients and packaging materials, according to executives.

Nestlé sets carbon target for KitKat: 'We are reducing and removing emissions to reach carbon neutrality by 2025'

Over the next four years, Nestlé will be working within and outside of its value chain to reduce and remove emissions related to its KitKat brand. The goal, a company spokesperson explained, is carbon neutrality.
